iSkin fuze 360

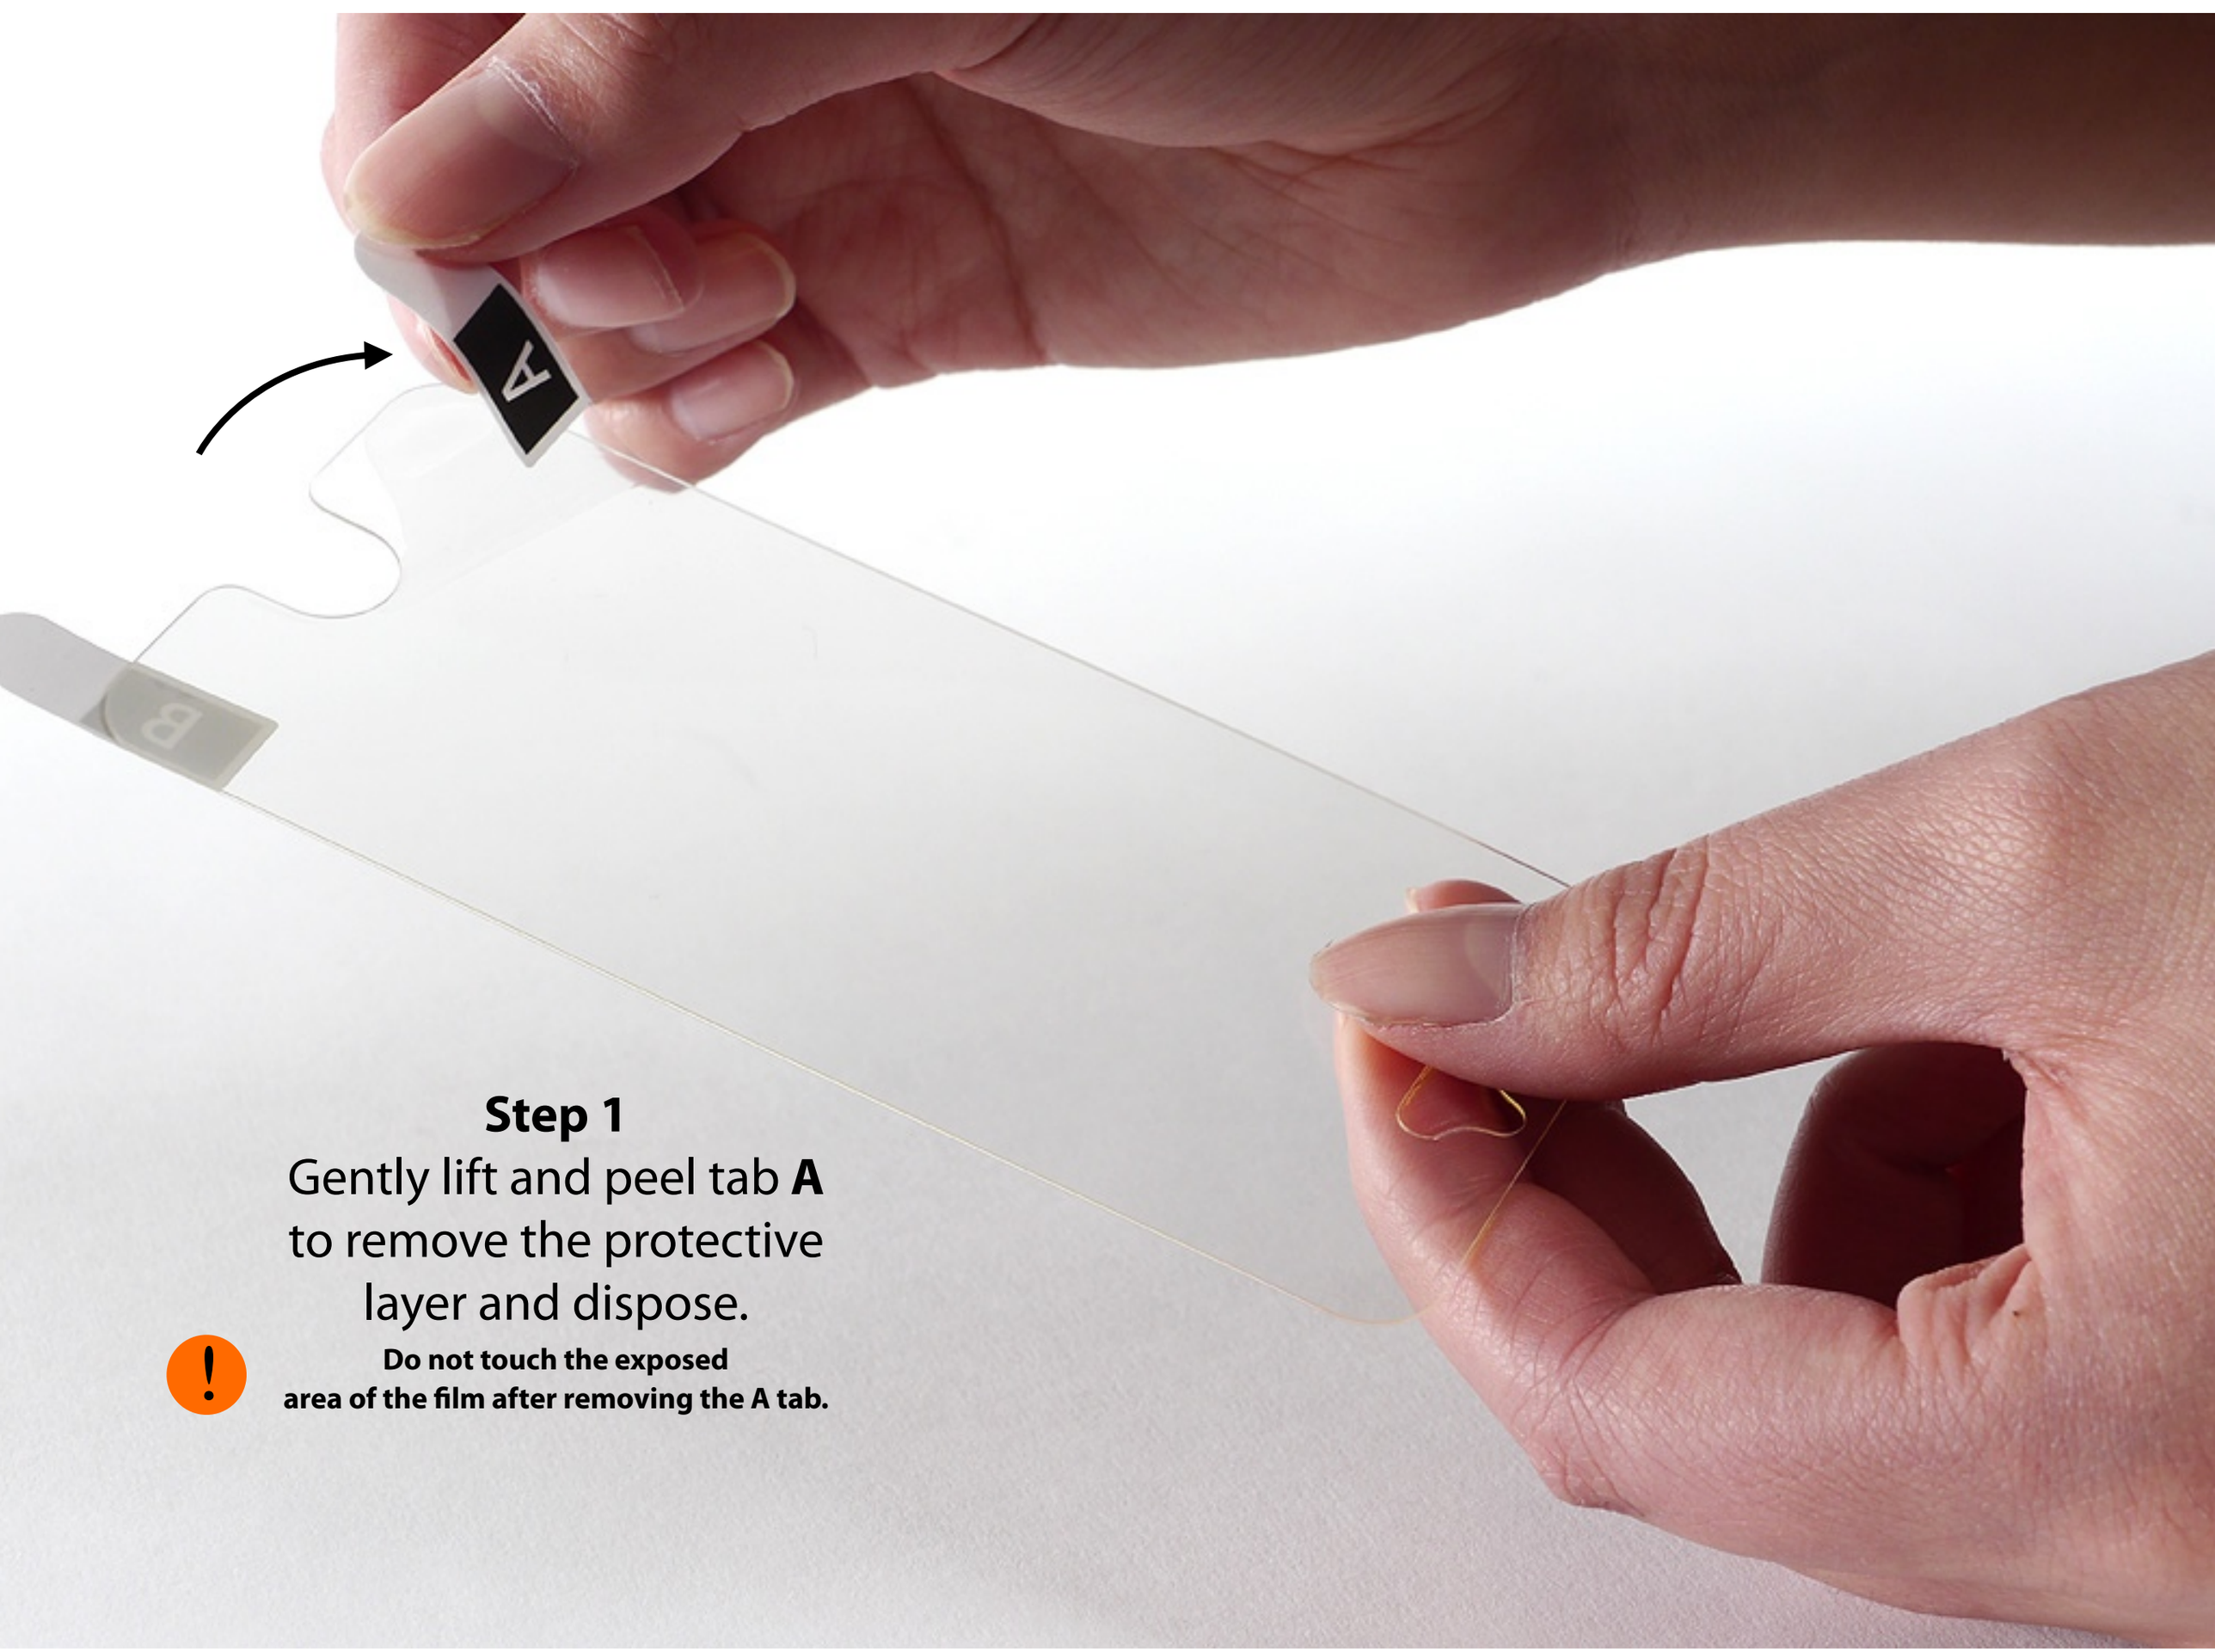
Install Guide

Prepare the iPhone

Step 1

Clean the iPhone 5 to remove dust, smears and lint using the included LCD wipe and microfiber cloth.

Installing the ProTouch® Titan Film



Step 1

Gently lift and peel tab **A** to remove the protective layer and dispose.

Do not touch the exposed area of the film after removing the A tab.

Step 2

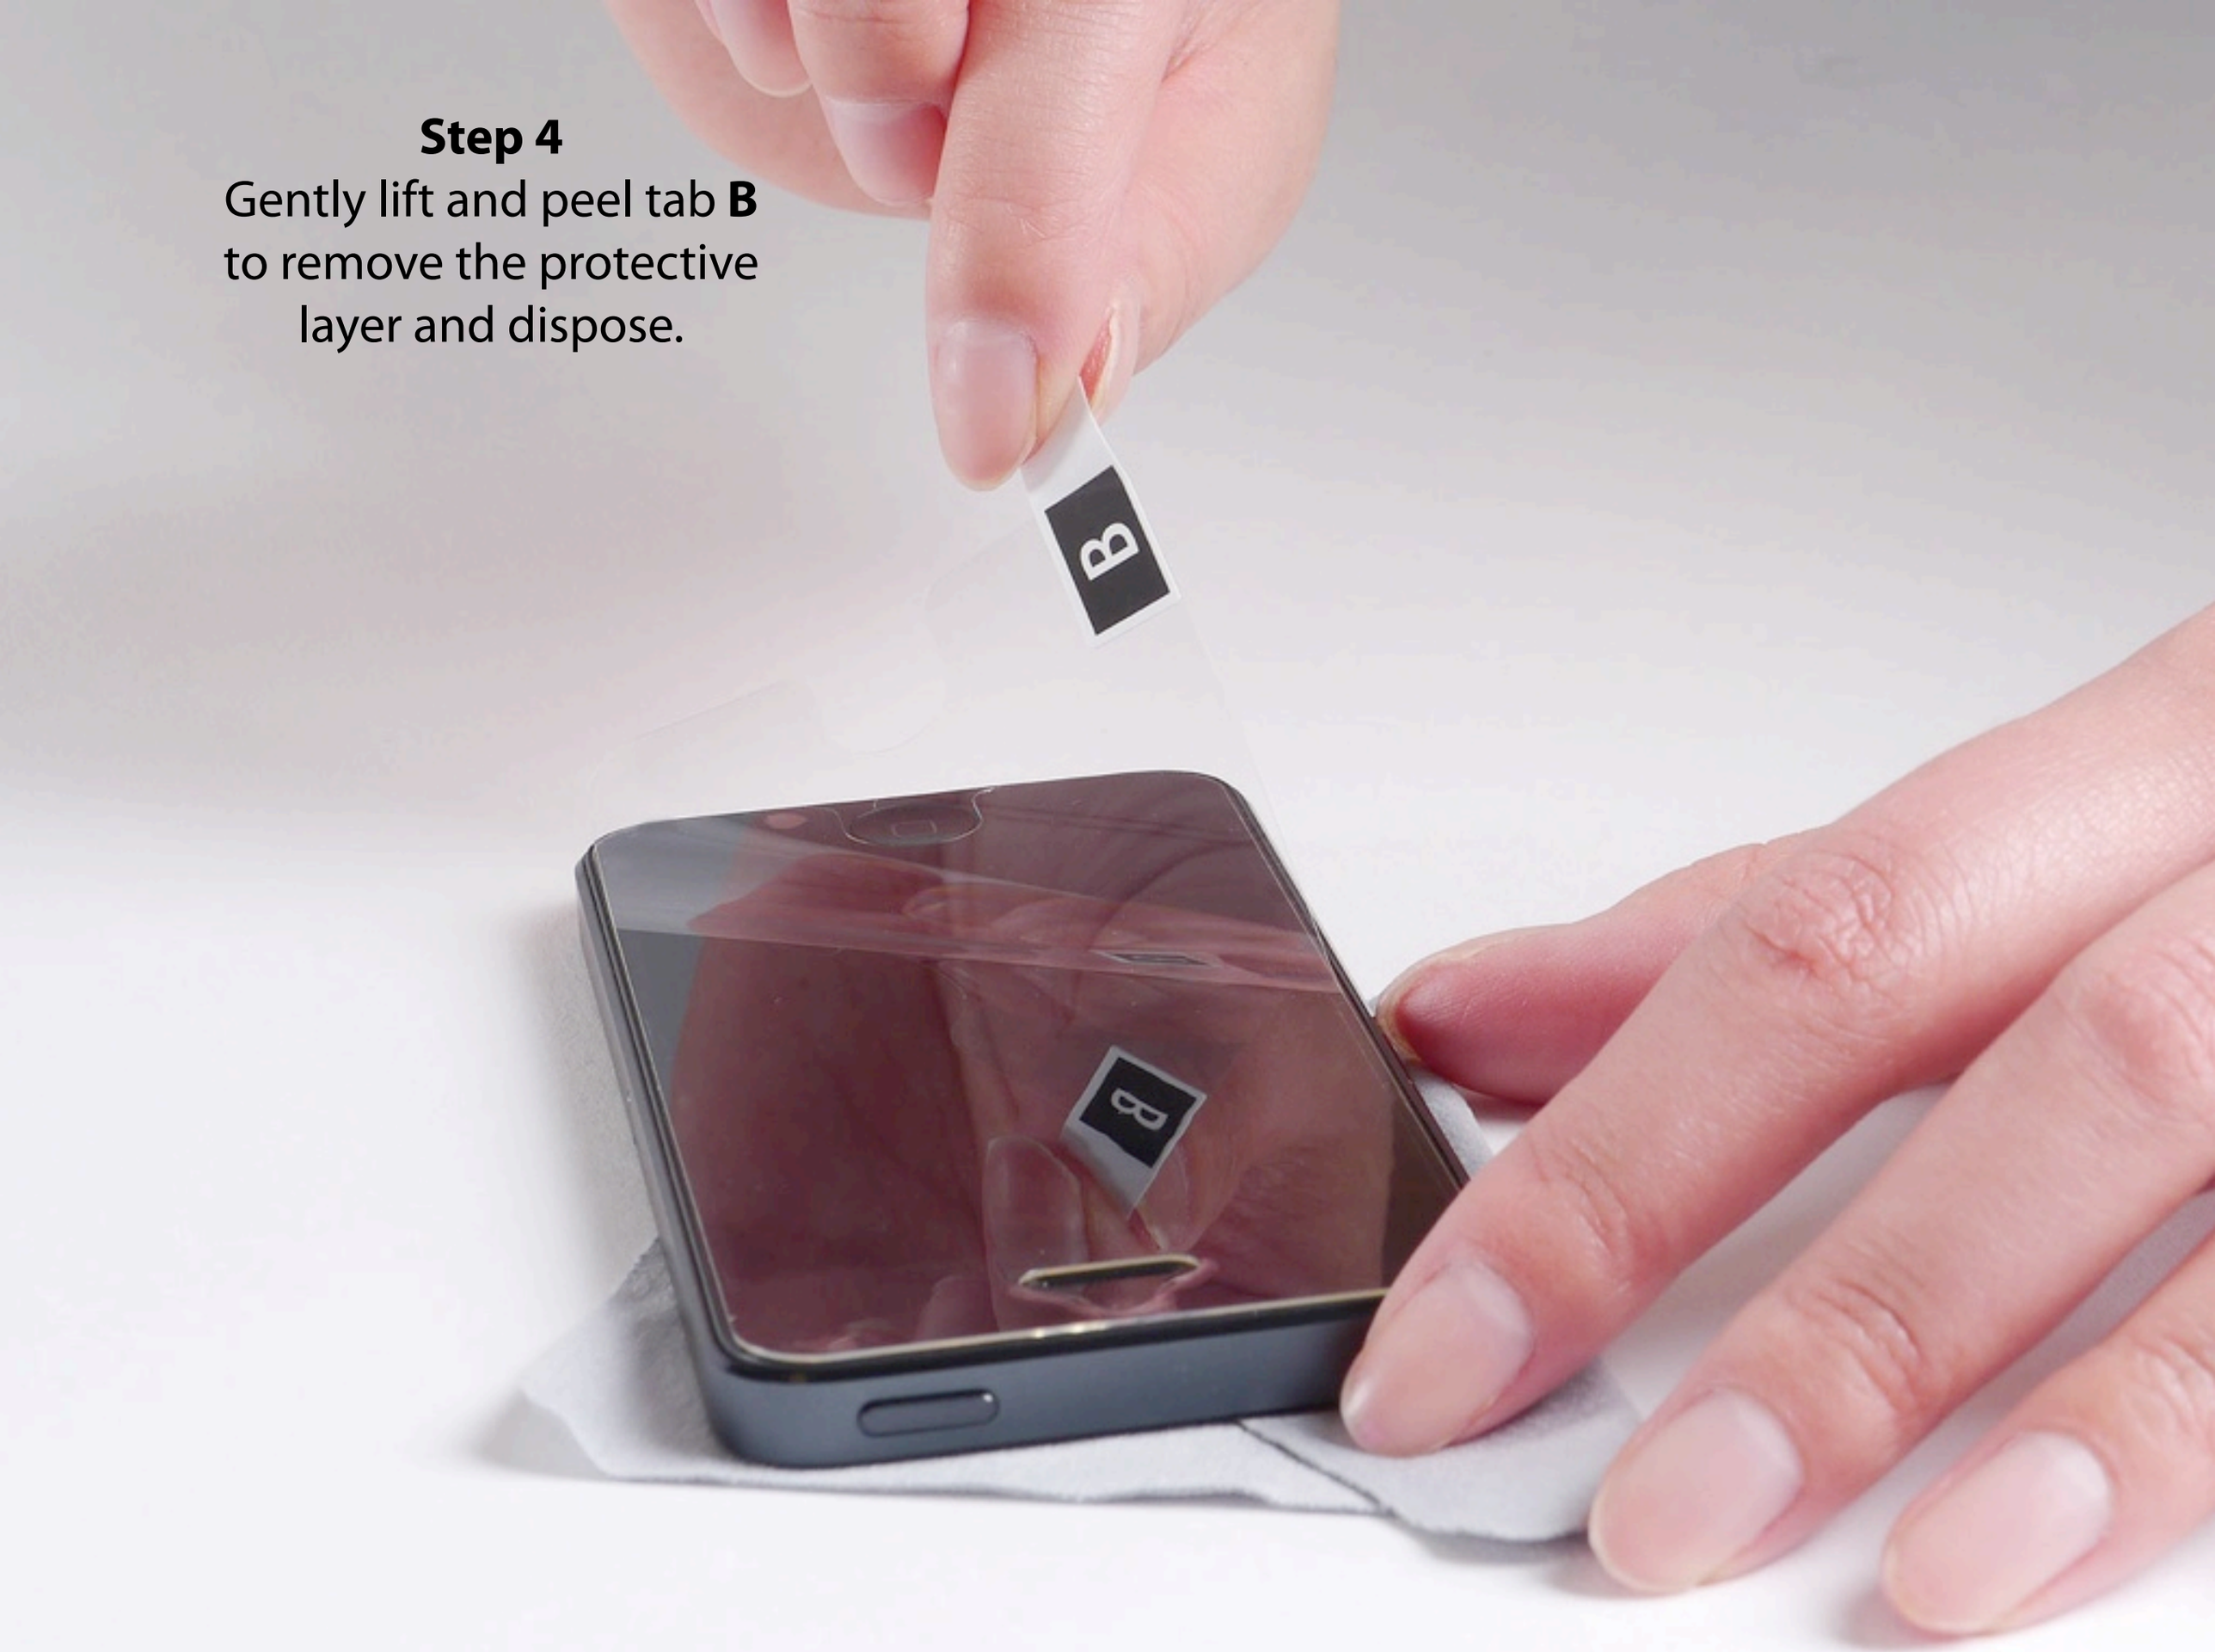
With the **A** side facing down towards the screen, align the film over iPhone 5's screen as shown.

Step 3

Release the film onto the screen's surface and smooth out any air bubbles that may have formed.

Step 4

Gently lift and peel tab **B** to remove the protective layer and dispose.



Installing the fuze *360*

Step 1

Place the iPhone 5 into the back portion of the fuze 360 starting with it’s left side.

Step 2
Snap the rest of the iPhone 5
into the fuze 360 case.

Step 3

Attach the top portion of the fuze 360 by first aligning the puzzle piece at the top as shown.

Step 4

Snap all corners of the case to secure the top portion to the iPhone 5.

Step 5

Ensure the Lightning Port protector is secured.

How to Remove

Step 1

Gently pry apart by lifting the top portion from silence switch opening.

Step 2

Gently unsnap the top portion and fully separate. Remove the iPhone from the bottom portion of the fuze 360.
